Good Afternoon Captain,

Sorry for the delay but I wanted to get with my staff and make sure we get you the spots that have been getting the most attention from us before I sent you a list. Your staff has been amazing and the Reset Team has been extremely strong in their efforts to assist our Purple Team.

The top 5 are:

- 4th & Hope Underpass, we have had a lot of drug activity in this area as there are many needles that are cleaned up daily by our clean team. We also have had the same 3 or 4 individuals hanging out on the walls on the underpass. Wells Fargo has had many issues there as well, they have an exit egress about 50 feet from there and there is a small green space and walkway between the two that invites this activity.
- Lower Grand, Graffiti has been quite active lately in this area but most of the problems have been during the evening hours. During the day is manageable due to the activity of the loading docks. The encampment at night sometimes can hit as high as 16 people but has been averaging 10-12.
- Angels Flight has been a real mess. Graffiti, trash and encampments on private property. We have been trying to get the city to lock the gates to the stairs at night and open again by 6am as had been the case up until a few months ago when the locks and chains went missing. There is a big encampment halfway up the stairs on the left if you are coming from Hill St. We have tried many times to get them out of the private property area and have not had any success. ("we are in a closed park, who are we bothering" is the quote daily)
- Fig & 1st, there is an encampment with 6-8 homeless by the pipe near the rocks.
- 708-725 S. Hill. There are side by side parking lots that have encampments on the sidewalk and in the lots themselves. "Angel" (the woman who was on 9th & Olive) has taken over the sidewalk again.

I hope this helps and I cannot thank you and the LAPD enough for your amazing partnership with the DCBID. Please do not hesitate to reach out with anything you may need from the BID as well. Sgt Hamer can reach out to our Captain Jorge Castro 213-454-3051.

Subject: Good Afternoon

Good Afternoon Brian,

On prior occasion, we discussed our deployment of a WESTSIDE Detail to address transient issues outside of the SKID ROW area. If you provide me your top five business that we can provide extra attention regarding these type of issues, I'll get the information to the sergeant in charge of that unit, Sgt. Mark Hamer.

I've already spoken with the SKID ROW Unit supervision and they have deployed appropriately so we can address the blockage of doorways, egress/ingress areas, driveways of business's, tents, etc... With your help, I'd like to have those 5 businesses identified so we can begin our action plan.

We are developing a list of high priority locations from each BID outside of SKID ROW. This list of locations will be addressed each weekday, except Fridays by the WESTSIDE Detail.

Thank you,
